About Me

Passionate computer engineer with a strong foundation in software development, embedded systems, and digital design, complemented by extensive extracurricular leadership experience. Through multiple roles in the AUC Student Union, including Crisis Member, Logistics Head, Crisis Allocation Manager, General Manager, and Treasurer, I have developed strong skills in event management and production, team leadership, planning, procurement, budgeting, fundraising, and crisis management. My experience organizing large-scale events, concerts, tournaments, screenings, and student activities has strengthened my problem-solving, communication, negotiation, creativity, conflict resolution, delegation, and time management skills. I bring a balance of technical knowledge, operational experience, and leadership capabilities, allowing me to work effectively under pressure and deliver solutions in dynamic environments.

Education

Bachelor of Sciences in Computer Engineering (June 2026)

The American University in Cairo

Comprehensive computer engineering program covering software development, digital design, embedded systems, and advanced algorithms. Relevant coursework includes Machine Learning, Cybersecurity, and Distributed Systems.

A-Levels (2020 - 2021)

Modern English School Cairo

Computer Science (A*) • Physics (A*)

Experience

Artificial Intelligence Team Intern (2025)

E&

Gained exposure to applied AI in customer experience, conversational systems, and real-world product deployment.

IT Audit Intern (2025)

PwC

Gained hands-on experience in developing Risk Control Matrices (RCMs) and understanding audit methodologies in a professional services environment.

Event Setup and Management (2024)

Perfect Touch Events

Gained experience in on-ground event setup, vendor coordination, and logistics execution for smooth and professional event delivery.

Automation Introduction Intern (2024)

Global Technical Services

Developed foundational understanding of automation workflows and industrial control environments.

AI and Information Visualization Intern (2023)

Teradata

Delivered a final project on Linear Regression, covering data preprocessing, model building, and result interpretation.

Skills

Programming

C++, C, Python, Rust, Arduino, VHDL, HTML, CSS, JavaScript

Professional

Leadership, Problem Solving, Teamwork, Project Management

Selected Projects

- **Thesis - Smart Planting**

IoT-based smart agriculture system with AI-powered plant health monitoring and automation

- **Audio-to-Haptic Directional Alert Band**

ESP32 assistive system that detects siren-like sounds and translates their direction into haptic feedback.

- **Distributed Systems Platform**

Instagram-like social media platform with data distribution

- **Digital Forensics Investigation**

Structured forensic analysis with data recovery techniques

- **Machine Learning Model**

Data analysis and prediction with preprocessing and evaluation

- **Video Game Database System**

MySQL relational database with GUI for data analytics

- **RISC-V FPGA Implementation**

Pipelined RISC-V processor on Nexys A7 FPGA supporting RV32I instruction set

- **Search Engine**

Webpage filtering and ranking system using relevance scoring

- **Shooter Game**

Third-person shooter game in C++ using Qt Creator for graphics

Leadership & Activities

Student Union (2022-2026)

Multiple leadership roles including General Manager, Logistics Head, Crisis Manager and finally Treasurer. Organized major events including AUC Exotics, Cap'N'Gown, and El Mahata Cairokee Concert.

Student Senate (2023-2024)

CSCE Senator - Represented Computer Science and Engineering students

Mashroo3 Kheir (2023)

Member of Bel Alwan 2023

3alRaseef (2024 - 2025)

Treasurer
